Address
Tilottama-1, Rupandehi

Education

2018-2023
Bachlor in Computer Application(BCA)
Tribhuvan University/Nepathya College

2015-2017
+2
Manimukunda College

Skills

- Java
- Spring Boot
- Database(Mysql, Postgresql)
- API Development (Swagger, Postman)
- Project Management (Jira, Redmine)
- HTML/CSS/Bootstrap
- Basic Flutter
- Basic JS
- Selenium
- Quarkus

Language

- English
- Nepali

Ram Thapa
Software Developer

Dedicated software developer with expertise in Java, Spring Boot, Quarkus, Hibernate, PostgreSQL, MySQL, along with foundational knowledge in JS, Flutter, and Docker. Proficient in API development and testing using Swagger and Postman. Committed to delivering high-quality solutions while staying abreast of emerging technologies.

Experience

APR 2023 - Present
Smart Solution Technology | Kamaladi
Java Developer
- Led development of robust financial systems and a sophisticated booking platform.
- Technologies used: Java, Spring Boot, Quarkus, Hibernate, PostgreSQL, and Docker.
- Managed projects from inception to delivery, ensuring scalability and adherence to industry standards.
- Proficient in Jira and Redmine for effective project management.
- Fostered collaboration and optimized team dynamics.

FEB 2022 - AUG 2022
InfoxIT Pvt Ltd | Butwal
Junior Java Developer
- Developed key modules as a junior Java developer on an ERP system.
- Utilized Spring Boot, MySQL, and Hibernate to ensure performance and functionality.
- Engaged in Agile processes, fostering collaboration and preparing for complex projects.

NOV 2021 - JAN 2022
InfoxIT | Butwal
Internship | Java Developer
- Acquired valuable experience in project management tools, manual and automation testing, and quality assurance practices.
- Leveraged cutting-edge technologies and tools to enhance contributions to software development projects.
- Prioritized collaboration and quality throughout all stages of project execution.

Worked Projects

Online Financial Management System(OFMS)
- Developed software for OFMS using Java, Spring Boot, Hibernate, PostgreSQL, and managed tasks with Redmine.
- Collaborated with a Senior Software Engineer, gaining new insights into software development.

Accounting
- Employed Java, Spring Boot, Hibernate, PostgreSQL, and Docker for project containerization akin to OFMS.
- Successfully concluded the project, acquiring valuable insights into modern software development practices.

Booking System
- Created Quarkus-based booking system for fast deployment.
- Used Quarkus with Java for microservices development.
- Ensured system reliability and performance standards.
